## Reserve Computers

If staff time is limited, you can help facilitate access to the MOOC for those that don't have the required technology or equipment at home. Book off an entire lab or a select number of computers in your branch, and set aside a specific day and time of the week for customers to come in and access the MOOC at their own pace, on their own time.

Help support the participants' independent learning by having printed copies of the course notes ready for them when they come in to access the MOOC on library computers during scheduled times.

**Time Commitment:** Minimal staff time required.

### What You'll Need:

- Access to a library computer lab, or select branch computers that you can reserve
